

RAZOR WIRING GUIDE

Document Number 0066-00005-000

1251 Columbia Dr.
Richardson, TX 75081
Phone: 972 680 1550
FAX: 972 680 3262

CONNECTION BOARD DESCRIPTION

Power Wiring

Voltage Requirement: 24 VDC (18-28 VDC)
Power Requirement: 5 Watts typical, 10 Watts Maximum
Terminal Block accepts wires from 12 to 28 AWG gauge
Power Input is internally Fused (F1 - 0.5A)

IMPORTANT: An uninterrupted earth wire must be connected to the P.E. terminal (Protective Earth) to prevent electric shock hazard.

Analog Input Wiring

Razor's A.I. to Loop Powered A.O.

Razor's A.I. to Active A.O.

Razor's A.I. to Loop Powered AO (Using Razor's Power)

Analog Output Wiring

Razor's A.O. to Passive A.I.

Razor's A.O. to Active A.I.

Razor's A.O. to Passive A.I.
(Using Razor's Power)

RS485 Wiring

Relay Wiring

Relay Contact is Normal Open and internally Fused (F2-0.5 A).
Maximum Rating 24 VDC, 0.5 Amps
